Module 2 Quiz – Prompting & Hallucination Control

1. T/F: Assigning a role in your prompt helps improve tone and vocabulary.

2. What does the 'C' in CRRC stand for?

   A) Creative

   B) Clarity

   C) Control

   D) Content

3. Which of the following formats is BEST for structured automation?

   A) XML

   B) Markdown

   C) JSON

   D) Table

4. T/F: A well-structured prompt eliminates all hallucinations from AI.

5. Which of these helps reduce hallucination risk?

   A) Making the prompt vague

   B) Using more complex vocabulary

   C) Lowering the temperature

   D) Adding unrelated examples

Answer Key: Prompting & Structure – Quiz

1. **True**
   (Assigning a role (e.g., "Act as a lawyer") helps guide tone, vocabulary, and context for better AI responses.)

2. **B) Clarity** ✅
   (The 'C' in CRRC stands for Clarity—an essential principle in prompt design.)

3. **C) JSON** ✅
   (JSON is the most widely used format for structured data in automation workflows.)

4. **False**
   (Even strong prompts can't eliminate all hallucinations; they just reduce the risk.)

5. **C) Lowering the temperature** ✅
   (Lower temperatures make AI responses more focused and less prone to hallucination.)
